

Technical Data Sheet

General Information	
Product Name:	Dedpan [®] DS 2020
Product Description:	Dedpan [®] is a patented family of vibration damping materials which when applied to stiff metal, plastic panels or similar structures inhibits the build-up of resonant vibrations, dramatically reducing the levels of radiated noise. Included in this family is a range of specially developed visco-elastic damping sheets with exceptional damping performance to weight ratios. DS 2020 includes a self-adhesive backing (acrylic adhesive with a white polyolefin release liner).
Construction:	Damping Sheet / Acrylic Self-adhesive Backing.
Application:	Dedpan [®] DS2020 is a lightweight visco-elastic damping sheet which can be used on an extensive list of applications including marine craft, automotive panels, metal roofs, household appliances, machine housings, and materials handling equipment. The product is highly conformable and provides a permanent bond to surfaces of almost any shape at any orientation. Surfaces must be clean and dry to accept the self-adhesive. An even pressure (roller or hand) should be applied to form a bond. A guide to application is available on request.

Technical Data

Description	Data	Unit	Tolerance	Test Method
Apparent Density	1850	Kg/m ³	+/- 10%	DIN EN 1602
Reaction to Fire	Pass	-	-	FMVSS 302
Nominal Weight	1.85	Kg/m ²	+/- 10%	-
Nominal Thickness	1.0	mm	+20/- 10%	-
Adhesive Peel Strength on Aluminium	15	N/25 mm	Minimum	Internal
Colour	Green/White (Front/Back)	_	-	-
